

# Vixen Scope Test

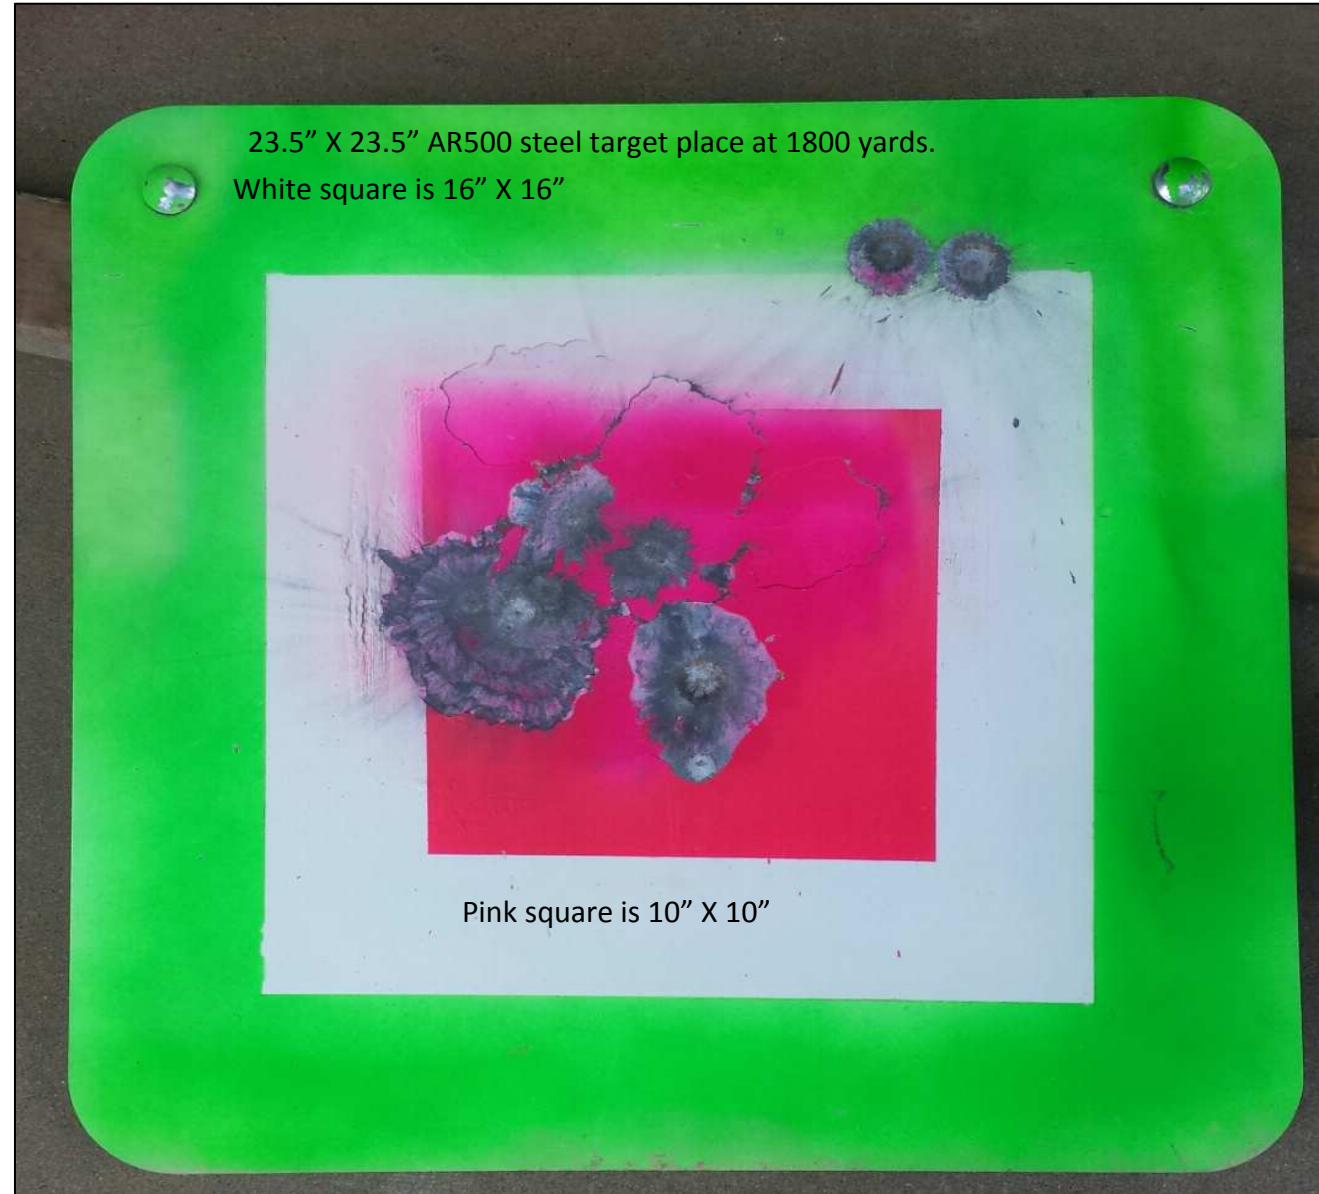

Vixen 5-20 X 50 scope tested on a Barrett M99 50 BMG.

## Pros:

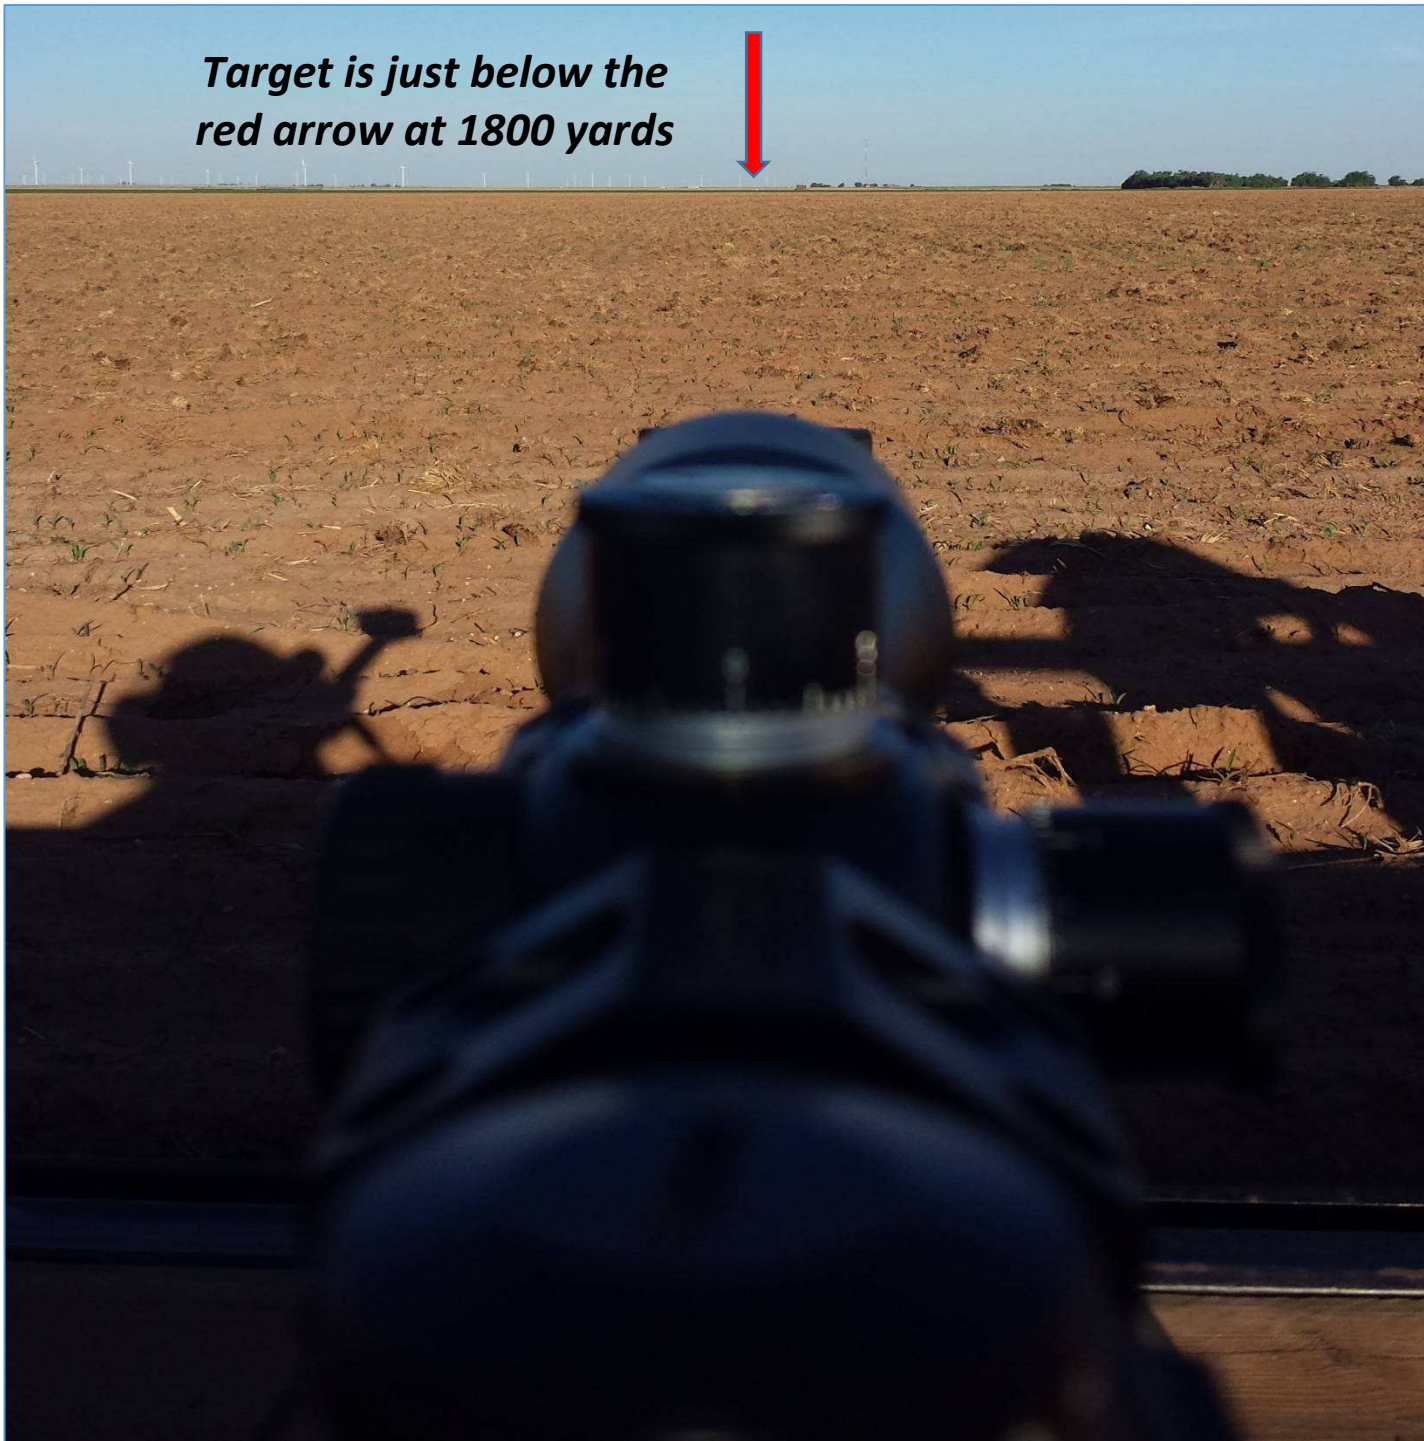

- Clarity throughout entire magnification range was outstanding
- Turrets well marked and tall for quick corrections
- Precise MOA adjustments
- 30mm Tube for durability
- Able to withstand large caliber recoil
- Illuminated red dot
- Able to view targets in low light conditions

## Cons:

- Minimal internal MOA adjustment (55)
- No Sunshade
- No MOA reticle

***Target is just below the  
red arrow at 1800 yards***

*Zoomed in over the top of the Vixen scope, target is the small white square below the arrow.*

***Vixen 5-20X50 scope attached to my Barrett M99 50 BMG (27 MOA rail) with 15/40 MOA Barrett XRings (set at 15 MOA)***

*45\* side profile of gun and scope*

*Over the top view*
